# Reynald Maala

**FULL STACK DEVELOPER** 

rcmaala@gmail.com 204-807-7698 linkedin.com/in/reynaldmaala github.com/reymaa19

#### **PROFILE**

Versatile full stack developer with hands-on experience designing efficient, user-friendly solutions for the music and healthcare industries in Winnipeg. Eager to showcase strong technical skills and contribute a fresh perspective to a team focused on innovation and developing maintainable solutions that address real-world challenges.

#### **SKILLS**

**Languages:** JavaScript, Python, C#, Java, PHP, HTML, CSS, SCSS

**Frameworks:** React, Express, Node.js, .NET, Tailwind CSS

Component Libraries: shadon/ui,

Material UI, Bootstrap

**Databases:** MySQL, Microsoft SQL Server, MongoDB, DynamoDB

**APIs:** Document Object Model (DOM), RESTful APIs, GraphQL, API Gateway

**Tools:** Amazon Web Services (AWS), Git, GitHub, Jest, Cypress, Figma, Postman, Twilio

#### **EXPERIENCE**

## Back End Developer Co-op | QDoc Inc.

AUG 2022 - DEC 2022, Winnipeg, MB

- Played a key role in developing an automated scheduling system using AWS Lambda and cloud-based serverless logic, streamlining repetitive tasks and reducing the workload for physicians and medical receptionists.
- Utilized RESTful APIs to retrieve, manipulate, and integrate internal and external data across various systems, enhancing the user experience for physicians and significantly improving data accuracy.
- Implemented OAuth 2.0 authorization code flow, strengthening API security by ensuring robust access control, protecting sensitive data, and preventing unauthorized access to critical resources.
- Crafted comprehensive developer manuals to assist technical teams with backend setup, API integration, and configuration, leading to smoother deployments and quicker troubleshooting.

## Full Stack Developer Co-op | Red River College Polytechnic

MAY 2022 - AUG 2022, Winnipeg, MB

- Contributed within an agile environment utilizing the MERN Stack for development and effectively managed version control with Git and GitHub to deliver a unique software solution for the Winnipeg Jazz Orchestra.
- Reduced file loading times from up to 6 minutes to under 18 seconds by implementing efficient **DevOps** strategies and streamlining deployment with **GitHub Actions**, significantly enhancing performance.
- Gathered requirements from clients, created user personas, developed wireframes, and crafted user stories to guide design and development, ensuring alignment with client needs and project goals.
- Took initiative to design and present an interactive prototype during early development stages, effectively demonstrating core features to stakeholders and accelerating project buy-in.

#### **PROJECTS**

## Full Stack Developer | NBA Fantasy Zone

OCT 2024, CAPSTONE

 Developed a full-stack fantasy basketball platform with an intuitive interface for managing teams throughout the NBA season. Utilized React with shadcn/ui for the frontend, Express.js for the backend, MySQL for data storage, and Python for automated data collection.

#### Front End Developer | Bell Initiative Matcher

OCT 2024, HACKATHON

 Designed a responsive donation system for Bell Canada using React, SCSS, and Material UI. The system integrated seamlessly with existing user flows and featured dynamic contribution charts, all while conducting code reviews and managing pull requests to uphold high project standards.

#### **EDUCATION**

## BrainStation | Diploma, Software Engineering

AUG 2024 - NOV 2024, Online

Red River College Polytechnic | Diploma in Business Information Technology

JAN 2020 - APR 2023, Winnipeg, MB
